

It May Be Time to
Consider a Clinical Trial
if you, like 4 million other American families
have a loved one with

ALZHEIMER'S DISEASE

If you have a loved one who has been
diagnosed with probable
Alzheimer's Disease, or
has ***Memory Problems*** that may be a
sign of Alzheimer's Disease, they may be
eligible to participate in a research study of
an investigational medication if they are

- At least 50 years old
- In generally good health, and
- Have a reliable caregiver or family member
willing to attend all trial visits
